	Total:	\$1,963.00

*On rare occasions, there may be need to supply guests with various pieces of technical equipment, either by renting or, in desperate cases, purchasing the items in question. For example, if a potential guest does not possess a microphone of adequate quality for the purposes of podcast recording, it may be necessary to provide access to such equipment. In most cases, a guest's existing computer equipment will suffice for our purposes, so we don't anticipate this being a regular need.
