New from *History of Political Economy*

The Political Economy of Development Economics: A Historical Perspective

A supplement to
History of Political Economy (vol. 50)

Michele Alacevich and Mauro Boianovsky, issue editors

This supplement offers a history of development economics through the contributions of both historians of thought working on development economics and development economists with an interest in the history of their discipline.

This new scholarship provides a nuanced and rigorous analysis of the complex nexus between historical contingency, political options, theoretical developments, and institutional expediency that have affected the historical evolution of development economics.
